

Generic Settings

1. **'Incoming/POP'** server settings to *pop.olemiss.edu* .
2. **Enable SSL encryption for POP.** This is to enhance the security for users downloading their e-mail.
3. **'Outgoing/SMTP'** server settings: *mail.olemiss.edu*. Note that this only applies to computers located on the campus network and **will NOT work for off-campus ISPs**. Off campus users should use their ISP's e-mail server for outgoing e-mail.

These above settings are all that is necessary for you to connect to the Ole Miss e-mail server with your favorite POP client. For instructions specifically tailored for many common POP clients, please see <http://www.olemiss.edu/email/>. If you have difficulty, please contact the IT Helpdesk at 662-915-5222.
