

**JAMES O. EASTLAND COLLECTION**  
**FILE SERIES 3: CONSTITUENT FILES**  
**SUBSERIES 4: STATE/LOCAL FILES**

The sixty boxes in the State/Local Files subseries are arranged in alphabetical order, primarily by community or county name, although bodies of water, organizations, institutions, and topical themes are also represented. Most of the files contain information and correspondence related to federal grants and constituent requests for the same, although the records also include requests for Eastland to intervene in the federal bureaucracy on behalf of a community or group. Consequently, this subseries holds files documenting the senator's interaction with various branches of the state government.

File Series 3, Subseries 4 can provide a rich source of information for state and local historians. Researchers interested in a particular locale should check files under the community name, county name, nearby bodies of water, and scan the list of folders that begin with "Mississippi" for likely candidates. Curators placed documents related to more than one specific locale in a topical "Mississippi" folder.

To assist researchers interested in a specific subject, records for locales are also subdivided by a fairly standardized set of subcategories, such as Airport, Education, Flood Control, Health Care, Highways & Roads, Post Office, and Sewage & Water. Folders for locales without a subcategory contain information that did not relate specifically to one of the standardized subcategories or that held data on more than one subcategory.

Researchers interested in flood control should also examine files related to "Agriculture" for information on watersheds and Soil & Conservation Districts. Other documents on the subject may appear in files on specific bodies of water.

A substantial amount of civil rights material also appears in general locale files as well as subcategories on "Education," "Hospitals," "Health Care," and specific military facilities.

Disaster relief researchers may also find relevant information on agricultural disaster relief due to weather and flooding in "Agriculture" files.

Researchers interested in specific banks, hospitals, and community development programs should also check out the Corporate Case Files subseries.
