

Jamie L. Whitten Collection
Series 31: Employment, Patronage, and Recommendations

The eight boxes in this series relate to employment and school admissions. A broad category, the documents may include information from or about individuals for federal or state jobs as well as careers in private business. Students sought recommendations to colleges, graduate schools, medical schools, and law schools. The files may contain correspondence from individuals wanting a position on Whitten's congressional or committee staffs. The files of individuals seeking appointments to military service academies such as West Point and Annapolis were not retained in the collection, although more general information related to academy appointments may be present. The series is arranged chronologically by year. The earliest file dates from 1960 and the latest from 1994.

Files related to Post Office patronage and employment are stored separately in Series 14: Post Office.
