Catching up...

Dreamweaver 8.0.2 free update is available

fixes that pesky "save password" problem (www.adobe.com/downloads/updates/)

Building a Web Form

Umform – sends e-mail when form is completed

http://www

- Umfile writes to a file when form is completed
- Umquiz records and grades form answers

(http://www.olemiss.edu/depts/it/webproject/faq.html#forms)

formation Technology

Webmaster Meeting

Using umform

One method of creating a form:

- 1. Open secure shell telnet window
- 2. "cd" to folder where you want a form to be
- **3**. Type "umform filename.html" this creates a file with the form in that folder

ittp//ww

- 4. Download filename.html into Dreamweaver
- 5. Edit/upload... repeat as necessary

Anatomy of umform
