ONLINE ACCESSIBILITY FOR STUDENTS WITH DISABILITIES

Session 1: Online Accessibility: Regulations and Guidelines
Wednesday, March 28, 2012 :: 1:00 – 2:30 p.m. EDT

Session 2: Online Accessibility: Tools, Tips, Resources, and Best Practices
Friday, March 30, 2012 :: 1:00 – 2:30 p.m. EDT

"I currently work with students with disabilities, and, as the use of online classes/material is increasing, online accessibility has become an increased point of discussion. I think this webcast provides information that is essential to any instructor that is planning to use online content, or any staff member of an institution involved in producing/maintaining online content."
– Shelley Lawson, Coordinator, Student Resource Center for ADA Services, Pensacola State College

"Being involved with special needs of students, it was good to see the accessibility of technology being openly discussed so all staff can have a better understanding of what is needed in being accessible, regardless of the learning disability."
– Paul Vincent, Adjunct Instructor, Adult Basic Education, Pensacola State College

Just as sunflowers turn their heads to catch every sunbeam, so too have we discovered a simple way to get more from our sun.

Daylight Saving Time gives us the opportunity to enjoy sunny summer evenings by moving our clocks an hour forward in the spring.

Yet, the implementation of Daylight Saving Time has been fraught with controversy since Benjamin Franklin conceived of the idea. Even today, regions and countries routinely change their approaches to Daylight Saving Time.

Here, you can learn about the history of daylight saving (or as some may say, daylight shifting), the standardization of time, and when regions around the globe spring ahead and fall back. Enjoy!
